

Tariff for the connection with the network for non-household customers in medium voltage are allocated:

T1 = 23000 ALL T2 = according to the distances table (a fix amount of the tariff within 1 km is 4500 ALL; an additional value for each 1 km is 4500 ALL.) T3 = 1,700 ALL/kW (to the required capacity) T4 = Tariff for the services to realize the new connection and the metering.

The tariff for the connection to the network for non-household customers in 35 KW voltage are as follows:

T1 = 23000 ALL T2 = according to the distances table (a fix value of the tariff within 1 km is 4500 ALL; added value for every 1 km is 4500 ALL.) T3 = 2000 ALL/kW (to the required capacity) T4 = Tariff for the services to realize the new connection and the metering.

The tariff for the connection with the network for additional capacity, connection modification or transferring for non-household customers in medium voltage are as follows:

T1 = 0 ALL T2 = according to the distances table T3 = 1700 ALL /kW (to the required additional capacity) T4 = Tariff for the services to realize the new connection and the metering.

Tariffs for the connection to the network for additional capacity, modification or transferring for non-household customers in 35 KW medium voltage are as follows:

T1 = 0 ALL T2 = according to the distances table T3 = 1700 ALL / kW (to the required additional capacity) T4 = Tariff for the services to realize the new connection and the metering.
