

REPUBLIKA E SHQIPËRIË
ENERGY REGULATORY AUTHORITY
BOARD

DECISION

No. 63, of date 26.02.2026

ON

THE CALCULATION OF REGULATORY PAYMENTS FOR 2026 PERIOD

Based on Article 17, point 4, Article 20, letter “d”, Article 35, point 1, Articles 45 and 46, Article 51, point 2, letter “dh”, of Law no. 43/2015, “*On Power Sector*”, as amended; Articles 14 and 30, point 3, Article 31, point 1, of Law no. 102/2015, “*On Natural Gas Sector*”, as amended; Article 5, points 5.2, 5.3 and 5.4, Article 6, points 6.1, 6.1.1, letters “a”, “b” and “c”, 6.2, 6.3 and 6.4, of the *Regulation on defining the regulatory payments*, approved with ERE Board Decision no. 190, of date 23.11.2017, as amended; Articles 15, 16 and 17 of the *Regulation on ERE organization, operation and procedures*, approved with ERE Board Decision no. 96, of date 17.06.2016, as amended; as well as point 2 of ERE Board Decision no. 112, of date 23.05.2025, “*On the calculation of the regulatory payments for 2025 period*”; ERE Board on their meeting of date 26.02.2026, after reviewing the report Protocol no. 721, of date 24.02.2026, prepared by Tariffs and Prices Directory, “*On the calculation of the regulatory payments for 2026 period*”,

Observed that:

- ERE defines and approves the regulatory payment that is paid from the licensees in power and natural gas sectors, in conformity with the legal provisions and the respective regulation.
- The regulatory payments for 2026 period are calculated implementing Article 6 of the “*Regulation on defining and approving the regulatory payments*”, according to the specific regulatory payment for each licensee, where according to point 6.1 the calculation is performed defining the specific weight of the incomes from the licensed activity during 2025 period to the total of the incomes in power and natural gas sector for the same period (the incomes according to point 6.1.1), and as follows, implementing point 6.2, the regulatory payment for each licensee is calculated as a product of this specific weight with the value to be distributed on ERE budget, after deducting the fix payments provided from the regulation.
- The total value for the purpose of calculating the regulatory payment for 2026 period has been determined according to ERE Board decision no. 352, of date 29.12.2025 “*On the approval of the Medium-Term Budget Program for 2026–2028 period and ERE budget for 2026 period*”, as well as the information document related to the ERE board meeting no. 03, of date 26.01.2026.

- In order to collect data for the calculation of regulatory payments for 2026 period, ERE, with the official letters protocolled during December 2025, reminded licensed entities the obligation to submit the financial statements and income declaration forms for 2025 period, taking into account the allocation into separate accounts for each licensed activity and for any other activity outside the sector.
- For entities that have submitted at ERE financial statements and the income declaration form for the 2025 period, the incomes generated from the licensed activity has been considered, implementing the relevant regulation provisions.
- For licensed entities that did not have activity in the previous year, in accordance with point 6.3 of the regulation, the regulatory payment has been calculated at a fixed amount of 100,000 (one hundred thousand) ALL.
- Given that some companies have not submitted financial statements for the year 2025, for the purpose of calculating the regulatory payment for the year 2026, the income generated during the year 2024 has been considered.
- Implementing point 2 of ERE board decision no. 112, of date 23.05.2025 “On the calculation of regulatory payments for 2025”, the differences resulting from the certified financial statements for 2025 period shall be considered in the calculation of the regulatory payments for the next period.
- After the corrections performed for the regulatory payments for 2025 period, approved with decision no. 112, of date 23.05.2025, continued with the recording of licensees who have submitted at ERE the financial statements for 2025 period, the value of which shall be allocated to the resulting regulatory payments for 2026 period.
- Based on the license register downloaded from ERE official website, a total of 419 licensees result as of 31.12.2025, who are subject to regulatory payments, according to the respective classification in production, distribution, transmission, supply, market operation and trading.
- The calculation of regulatory payments for 2026 period, was carried out based on the information obtained in accordance with the provisions of the legislation in force, according to point 5.4 of the regulation, licensees shall submit at ERE by January 31 of the following year the complete financial statements for the previous fiscal year and by June 30 an audited copy of the financial statements, from which information on the incomes generated from the licensed activity that are used in the calculation of regulatory payments results.
- For licensees that did not submit the financial documentation according to the requirements, information for the calculation of regulatory payments was obtained from OSHEE company reports regarding electricity production, the reports of TSO company on market participants' transactions, as well as from the National Business Center (NBC).
- For entities licensed in electricity production that have not submitted financial statements, incomes from operating activities is calculated based on the amount of electricity produced

during 2025 period, multiplied by the annual purchase price of electricity for existing priority producers, approved by decision no. 273, of date 13.12.2024, at the rate of 10 ALL/kWh.

- For entities licensed in the trading and supply activity that did not submit financial data and for which it was not possible to access information from other official sources, it has been estimated that the income realized in 2024 period will be taken into account, while the relevant corrections shall be applied to the regulatory payment of the following year, after the audited financial statements for 2025 period are filed, in accordance with Article 7 of the regulation.
- At the time of submitting the data on the licensed activity at ERE, the relevant corrections shall be carried out, as was done in any previous period of calculation of regulatory payments.
- It has been found that companies that have developed two or more licensed activities have not presented the allocation of accounts by activities, as defined in the legal provisions in force.
- From the analysis of the financial statements data and reports of DSO company for priority producers, it is noted that in some cases the incomes declared for 2025 period do not match the incomes resulting from the amount of sold electricity, based on the annual price of 10 ALL/kWh approved with decision no. 273, of date 13.12.2024; this phenomenon is regulated in the following period due to the registration of energy sales invoices to FTL for December 2025, in January 2026.
- For licensees that have not developed an activity or that have not started the activity for which they were licensed, the regulatory fee has been calculated at a fixed amount of 100,000 ALL, in accordance with points 5.2 and 6.3 of the regulation.
- The same fixed amount has also been applied to companies that have more than one license and have not submitted financial statements allocated according to the licensed activities; in cases where the accounts are submitted consolidated, only one of the activities has been calculated the regulatory payment by the specific weight, while for the other activities it is implemented the fix tariff of about 100,000 ALL.
- In the calculation of regulatory payments for 2026 period, the differences/corrections that resulted from the certified financial statements for 2024 period have been applied, in accordance with point 2 of ERE Board decision no. 112, of date 23.05.2025, bringing relevant corrections to the resulting regulatory payments for 2026, based on the incomes ascertained in the financial statements filed with the ERE and/or downloaded to the National Business Center .
- For a number of licensed entities, the regulatory payment for 2026 period has not been applied (has been suspended), because these entities are licensed with operating conditions, or result in a “suspended” status or are in the process of liquidation, making it objectively impossible to exercise the licensed activity and/or collect the payment; in case of a change in circumstances, their handle will be reviewed.
- For licensees that have not submitted financial statements or the income declaration form for

2025 period (as submitted in the report), for the purpose of calculating the regulatory payment for 2026 period, the income realized in 2024 period has been taken into account, as the closest official reference, administered by ERE or generated by the National Business Center (QKB).

- For the “NOVA SOLAR SYSTEM” company and “GreenNat Solar Park Ballsh” company given that the income for 2024 period does not represent a full fiscal year and the income for 2025 period is missing, the regulatory payment for 2026 period has been estimated based on the total amount of electricity produced during 2025 period, multiplied by the average annual price of the energy market in ALPEX for 2025 period, while in the following period, corrections shall be according to the certified financial statements of the relevant year.
- A fluctuation in the value of the regulatory payment for 2026 period compared to 2025 period is observed for some licensees, which is related to the administration of more complete financial data, e.g. the generation by the National Business Center (QKB) of the balance statement for 2024 period and/or the fact that some entities have started activity or have exercised full activity during 2025 period, unlike from 2024 period.
- Implementing decision no. 130, of date 27.06.2025, the regulatory payment of 100,000 ALL for 2025 period for “Energia Gas and Power Albania” company is reflected in the calculation of regulatory payments for 2026 period and the differences from this correction have been reflected.
- For the “Ujësjetës Kanalizime Korçë” company, since it resulted in a “de-registered” status in the National Business Center (QKB) and the Board with decision no. 186, of date 07.08.2025 decided to cancel the regulatory payment for the year 2025, the relevant corrections have been made in the calculation of the regulatory payments for the year 2026 for the entities affected by this correction.

For all of the above mentioned, ERE Board,

Decided:

1. Approval of regulatory payments for 2026 period according to the attached table.
2. The differences resulting from the audited Financial Statements for 2025 period, shall be considered in the calculation of regulatory payments for the following period.
3. Licensees subject to this decision (according to the attached table) shall execute the regulatory payments at ERE, no later than 30 days from the publication in the Official Gazette of this Decision, otherwise, they shall be subject to the application of administrative measures provided in Article 42, point 1, letter ç), point 2, letter b) and Article 107, of Law No. 43/2015 “On Power Sector”, as amended, Article 27, point 1, letter “ç” and Article 106, letter “a” (xi) of Law No. 102/2015 "On Natural Gas Sector", as amended,

and Article 5, point 1, of the "*Regulation on the procedures for imposing and reducing fines*" approved with ERE Board Decision no. 125, of date 29.07.2016, as well as Article 5, letter "ç" of the "*Regulation on the procedures for revoking licenses in the electricity and natural*

gas sectors", approved with ERE Board decision no. 58, dated 18.04.2017.

4. For licensees, for whom the regulatory payment for the current year has been suspended, if the legal circumstances that led to the suspension will be amended, this decision will be subject to review regarding the calculation of the regulatory payments that will result.

This decision enters immediately into force.

Each party involved in this procedure may request from ERE, within 7 calendar days from the date of receiving this decision, the review of the Board's decision if there are provided new evidences that may lead the Board to take a decision different from the previous one or for identified material errors. For this decision, may be filled an appeal on Tirana Administrative Court within 30 calendar days from the date of publication in the Official Gazette.

This decision is published in the Official Gazette.

ERE CHAIRMAN

Petrit AHMETI
